

## CANCER PREVENTION

Few diagnoses are more terrifying than “cancer.” Scientists have come a long way in their understanding of why cancer takes root in some patients and not others. Basically, cancer is like many other illnesses that, in my opinion, result from one or more of the following: bad genes, bad food, and bad attitudes.

Cancer is ultimately triggered by a “bad” gene, a gene that allows a normal cell to grow and divide until it takes over the body’s vital organs causing death. These “bad” genes can be triggered by chance, or by toxins in our food, water and air. Each of us will

make many “bad” cells that could potentially turn into a cancerous tumor. It is our immune system that is charged with seeking out and destroying these abnormal cells before they can develop into a cancer. “Bad” attitudes (ie...stress) can weaken the immune system, allowing cancerous cells to evade destruction and become dangerous tumors.

Patients with cancer, high levels of stress, and those who have a strong family history of cancer can use nutritional supplements to boost the “seek and destroy” ability of their immune systems. Clinical studies have repeatedly demonstrated the value and power of the supplements available in our Natural Pharmacy for patients who have had, currently have, or are trying to prevent cancer.

For your best chance to beat and avoid cancer, use nutritional supplements, eat/breathe/drink as cleanly as you can, and reduce the impact of stress on your emotional health using a healing discipline that rings true to you.

### Destroy Cancer Cells CORIOLUS-PS

by Health Concerns

- *Used in Japanese hospital cancer wards*

As any Oncologist treating cancer patients will tell you, chemotherapy and radiation do not kill every last cancer cells. After treatment, there may be trillions of cancer cells left alive, ready to attack a body weakened from cancer treatment. It is the patient’s own immune system that must awaken, mobilize, hunt and kill all of the remaining cancer cells.

Certain mushroom extracts are known to help boost the immune system to a level necessary to destroy cancer cells. Coriolus is such a medicinal mushroom that has been used for several decades in the cancer wards of mainstream Japanese hospitals to assist in the treatment of cancers of the breast, esophagus, lung, stomach, liver, colon, head and neck. Scientific studies prove that cancer patients receiving conventional treatment do better when they simultaneously use Coriolus extracts.

To date, there have been no reports of increased side effects in the patients using specific Coriolus extracts.

### Destroy Cancer Cells THEA-STAT

by Douglas Labs

- *For cancer, heart disease, stroke*
- *Patented green tea extract*

Everyone knows that green tea is good for you. However, not everyone has the time to drink the six to eight cups a day that are necessary to get all of the anti-cancer, immune-boosting, weight loss, and cardiovascular benefits that green tea is known for.

Thea-Stat is a patented extract of green tea theaflavins and catechins which are the two most potent, health-promoting benefits of green tea.

This is an important, breakthrough supplement for patients concerned about cancer, heart disease and stroke prevention because Thea-Stat contains a powerful concentration of the most powerful antioxidants found in green tea.

## 16 Powerful Medicinal Mushrooms

### HOST DEFENSE

by NewMark

- **Boost immune system by 400%**
- **Organic and wild**
- **Recommended for patient with increase risk of cancer**

As a physician practicing Integrative Medicine, I continue to be impressed by the healing powers of medicinal mushrooms. Scientists continue to add to the list of mushrooms that have proven health benefits which include boosting the immune system, reducing inflammation, promoting healthy cellular activity, supporting a healthy cardiovascular system, and

promoting longevity.

With all of the good health news on so many different mushrooms, it is hard to pick just one or two specific mushroom extracts for your daily regimen.

NewMark has solved this problem by creating Host Defense, a blend of 16 of the most powerful, best studied medicinal mushrooms. These mushrooms are wild-crafted and organic and then processed at the peak of their medicinal value for maximum health benefit.

NewMark has gone one step further and scientifically tested Host Defense which demonstrated the ability to boost key aspects of immune strength by 400%.

Host Defense should be used by patients who have or who are at increased risk for cancer and by those who need to boost their immune systems.

## Strongest Medicinal Mushroom

### CHAGA

by JHS

- **Targets cancer cells**
- **Also treats high blood pressure, diabetes, influenza, stomach ulcers and arthritis**
- **Grows only in wild**
- **Treats cancer of breast, uterine, liver and stomach**
- **Documented healing**

In the United States, we have always appreciated mushrooms for their gastronomic delights, but we are only just beginning to explore the tremendous value of mushrooms for their medical benefits.

For more than 3,000 years, Asian cultures have been using medicinal mushrooms to heal conditions ranging from fatigue to cancer. As an

herbal therapy, Chaga stands out as one of the most potent mushrooms.

Chaga is a mushroom that grows only on the Birch tree and is only wild-crafted, never farmed. There is an extensive, international body of research that has documented the healing properties of Chaga. This includes specific studies of Chaga as adjunctive treatment for a variety of cancers, including breast, uterine, liver, and stomach. Chaga has long been used in folk medicine as a treatment for high blood pressure, diabetes, influenza, stomach ulcers, and arthritis.

As with other medicinal mushrooms like Shitake, Maitake, and Reishi, Chaga also contains a panoply of nutrients to stimulate the immune system which is important for the body to fight conditions ranging from the common cold to cancer. Chaga, however, also contains specific nutrients that directly target and kill cancer cells. As such, Chaga is considered by many herbalists to be the strongest of all medicinal mushrooms.
